SINPRO
Creating Solutions

Reliable and seamless operation, proactive monitoring and event management, as well as keeping a business up and running are key advantages for any customer. These benefits ensure our customers that their business processes will not be interrupted. Customers can concentrate on their growth and not worry about routine operations related to control and site management.

Our solutions help to automate all manual or semi-manual processes. We use our expertise and experience to make our customers more successful.

InCentred
Enterprise

Incident Management System

InCentred Enterprise is a platform and tool to **automate all your processes** and **manage events** from connected systems.

Single interface, support for decision making-processes, modular architecture, distributed and failover operation scenarios are just some feature advantages of our platform.

APPLICATION FEATURES

- Control center
- Multi-user access
- Security
- Modularity
- Event management
- Distributed system
- Intuitive interface
- Configurability
- Stability
- Redundancy
- Scalability

MAIN ADVANTAGES

- **Automation** of monitoring processes and implementation of Standard Operating Procedures
- Support in **decision making processes**
- **Integration of 3rd party systems** into single data space
- Minimisation of **human factors**
- **Forecasting** algorithms
- **Data analytics**
- Geo referencing with **data visualization on map background**
- Resources and **actions coordination**
- **Workflow scenarios** with step by step operations for any event
- **Monitoring**
