

Event Control and Management System

InCentred EveOperate brings the **integration** functionality for audio and visual solutions, interactive systems, media systems and data systems into **single management platform**.

Central management and sources integration into a **single data space** are the main benefits of InCentred EveOperate implementation.

## APPLICATION FEATURES

- **Modular architecture** (Core, Management, VisualSpace, Operation, Visualisation, Application, Master)
- **Storage** of structured data and media content
- **Access allocation** in data space
- **Logging** of system processes and events
- **Centralized management** of media devices and sources

## MAIN ADVANTAGES

- Management of **thematic exposition categories**
- **Data allocation to end devices** according to topical sections of the exposition
- Management of **exposition data records**
- Visualisation of array with records in **stylish graphical view**
- Management of **media** content
- Mobile application with **audio guide, augmented reality**
- **Bespoke** / tailored design

## APPLICATIONS

Museums

Libraries

Events

Exhibitions

Expositions

Shows

Reliable and seamless operation, proactive monitoring and event management, as well as keeping a businesses up and running are key advantages for any customer. These benefits ensure our customers that their business processes will not be interrupted. Customers can concentrate on their growth and not worry about routine operations related to control and site management.

Our solutions help to automate all manual or semi-manual processes. We use our expertise and experience to make our customers more successful.
